

# EUROCORR 2017 20<sup>th</sup> INTERNATIONAL CORROSION CONGRESS & Process Safety Congress 2017

September 3-7, 2017  
Prague Congress Centre  
Czech Republic

EFC Event No. 417

## **Announcement of Workshop on Automotive corrosion:**

### **“Corrosion in automotive: prediction and prevention“**

The workshop is aiming at addressing principal issues and future challenges for the automotive industry in the field of corrosion protection and material selection and exploring possible solutions relevant for various players involved in this sector. This session shall guide automotive manufacturers, parts suppliers and material producers to make the optimum choice in materials and technologies for durable and safe in-service conditions (automotive structures and automotive components).

Due to the specificity of the automotive corrosion issues, one of the focus of the workshop is to stimulate the participation of industries as well as engaging discussions with specialists from industry and academia.

The themes covered in the workshop would be:

- Lightweight concept and challenges of the switch to high strength steels and light metal alloys
- Multi-materials impact
- Pretreatment and coatings for automotive
- Corrosion and design: how to aim at minimizing corrosion?
- Corrosion monitoring

Please submit your abstract online via [www.eurocorr.org](http://www.eurocorr.org) before 17 January 2017.

We are looking forward to your contribution to and participation in EUROCORR 2017/20<sup>th</sup> 2017 & 20<sup>th</sup> International Corrosion Congress & Process Safety Congress 2017

This initiative is supported by:  
EFC Working Party 17: Automotive Corrosion

Elizabeth Szala

Tomáš Prošek

Chair WP 17:  
“Automotive Corrosion”

President of the Congress

Expected duration: 1 full day

Audience: 60-80 attendees
